

EvolutionNext

Kyocera's EvolutionNext Series of A3 cloud-ready MFPs with AI-driven scanning and sustainable design make digital processes simple and efficient.

Kyocera EvolutionNext Series

A3 colour, copy, print, scan and fax

Cloud connectivity ready to go out of the box

Up to 70 pages per minute

1200x1200 dpi with advanced finishing

Suitable for large workgroups

Your Challenges, Our Solutions

Cloud Ready for Complete Control

These devices aren't just cloud-ready, they're cloud-active. With integration with our cloud suite, you can integrate freely.

Taking Productivity Further

Features such as handwriting enhancement combine with long-life drum of up to 600,000 impressions to enhance productivity.

Streamlined User Experience

Simple and efficient, with pre-installed cloud solutions and print integration via KX Driver makes these devices straightforward to use.

Print in Flying Colors

Kyocera's Tiered Colour System puts you in control of your color outputs so that you only pay for what you use.

Evolving for the Future

Maximize sustainability and minimize costs with our long-lasting drums and toner recycling which allows you to reuse toner for waste.

Security by Design

Meet stringent requirements including the highest level of government certification with FIPS 140-3 to keep your information safe and secure.

Finish Projects In-house

From Z-folding to hole-punching, the wide range of finishing options mean that you can bring finishing in-house.

Cloud Ready for Complete Control

Devices come with pre-installed cloud based software solutions that are easily accessible through the digital cloud platform on the panel. These solutions enable you to simplify your digital transformation journey through data capture, sorting of data, and print management of your devices without high costs or complexity.

Print Control

Save money and resources with Kyocera Cloud Print and Scan (KCPS) by eliminating on-premise servers while ensuring optimal security at all times.

Capture

Shift to a smarter workplace by digitizing, labeling and indexing documents at your device with Kyocera Cloud Capture (KCC) to streamline workflows.

Management

Securely access and control documents for maximum efficiency in hybrid work environments with Kyocera Cloud Information Manager (KCIM).

Remotely Handle Print and Scan

When it comes to output, it's important to ensure secure and cost-efficient management of print and scan to be able to handle these processes remotely. Mobile print and scan allows you to reduce costs by optimizing print usage and avoiding waste through a tool like Kyocera Cloud Print and Scan (KCPS).

- + Add print quotas in sectors such as education to ensure that administrators can optimize print usage and reduce waste.
- + Facilitate hybrid work or work across numerous locations, such as in construction or retail, where printing is needed on the go.
- + Access documents off-site and facilitate mobile access to data wherever you might be.

Capture to the Cloud

A cloud document management solution, Kyocera Cloud Capture (KCC) is a scalable, secure storage and organization tool for all hard copy and electronic files in a single location with daily backup. Available with a free 1-year trial, you can index documents with metadata assigned to each file to allow for easier searching and eSignature tools.

- + Finance teams can manage invoices efficiently with search and eSignature to ensure on-time payments and to meet audit requirements without hassle.
- + Digitize paper-based employee records for HR teams to support the talent lifecycle management.
- + Handle a vast number of critical documents and facilitate the easy tracking of files.

Process Data Efficiently

Manage documentation and data to facilitate the search and recovery system through a keyword search functionality, saving time in locating data and documents, while applying strict access permissions and automated workflows. Kyocera Cloud Information Manager (KCIM) is factory-installed and available at a low initial cost with no server requirements.

- + Automate the lifecycle of contracts and invoices by limiting user access and assigning ownership directly to owners to ensure a fluid process.
- + Collaborate across work locations, whether remote, in-person or hybrid, by sharing documents and data.
- + Store customer records securely and share data when required with other members of relevant teams.

Taking Productivity Further

The Kyocera EvolutionNext Series drives efficiency further by ensuring that documents can be scanned and processed into the cloud with accuracy.

Paper Breakage Sticky Note

Image Defect Prevention
Automatically detects and corrects issues like smudges, streaks, or distortions in scanned or printed images, ensuring high-quality output.

Front Scan Back Scan

ID Card Scan/Copy
Captures both sides of an ID card in a single scan and arranges them on one page for easy printing or digital storage.

Original Emphasis

Handwriting Enhancement
Improves the clarity and legibility of handwritten text in scanned documents, making notes, forms, and signatures more readable.

Scanning Tilt Correction

Tilted Document Correction
Automatically straightens scanned documents that were captured at an angle, improving readability and presentation.

Sample Convert

Super Resolution
Enhances low-resolution images or scanned documents using AI-powered upscaling to improve sharpness and detail.

Scan up to 16 sheets at once Save by page/file

Multiple Cropping
Detects and extracts multiple sections from a single scanned page, saving them as separate files for convenience.

Streamlined User Experience

In addition to pre-installed cloud solutions and a modern user interface, the TASKalfa MZ7001ci Series incorporates seamless integration with OAuth 2.0, enabling secure authentication for cloud-based printing services. With support for Microsoft Universal Print and Windows Protected Print, it ensures a modern and secure printing experience across environments.

Print in Flying Colours

Our award-winning A3 lineup has been recognized by BLI as the **Most Colour Consistent A3 Brand Award** with good reason, as our products produce high-quality and low-cost colour printing.

Using five years of results from testing devices across the industry, our devices were chosen as the most colour consistent from hundreds of thousands of prints.

Tiered Colour System

Kyocera's Tiered Colour System uses firmware within our devices to measure usage levels for each document you print, so that you only pay for the colour you use.

Colour Optimizer

Select your desired colour match from our colour matrix, and our KX driver will use those RGB values to maximize colour output to the preferred hue and lightness.

Fiery Print Software

Using industry-standard colour profiles, Fiery ensures that there's an optimized colour match to meet your expectations from the screen to the printed document.

With
flexibility to
match your
needs

Print across media types

The Kyocera EvolutionNext Series can print across cardstock, coated, envelope, index tab dividers, labels, letterhead, plain, and recycled media.

And across sizes

Whatever the size you need, we've got it covered. From traditional sizes up to 12"x18" right through to banner sizes up to 12"x48", it's covered.

Evolving for the Future

At Kyocera, we firmly believe in doing the right thing as a human being for the world around us. Building upon these foundations, we seek to keep costs low and keep sustainability levels high across the board, through four main approaches:

Long-Lasting Drum

A Kyocera device has a drum life of up to 600,000 images, which is up to three times more than other manufacturers. Rather than needing to replace a solution's drum between one and **three times** through its lifecycle, you can reduce downtime and waste by counting on Kyocera technology.

Toner Lock Technology

Research shows that up to 10-15% of toner is wasted by being thrown away too early. Toner lock technology minimizes waste as toner automatically opens to make the toner replacement process easy and straightforward.

Toner Recycling

In addition to our Toner Recycling Program, black toner cartridges can be reused as waste toner collection units, recycling and ensuring that your device creates as little waste as possible.

Made from Recycled Materials

30% of plastics used in Kyocera products are recycled, and more than 99% of the total plastic can be recycled, ensuring that your footprint is kept to a minimum and environmental impact is limited.

Security by Design

Our security processes are drawn up to safeguard your data from start to finish on its journey through your workflows. With ISO Certifications for our design and manufacturing processes, your devices come secure from the very moment of conception right through to end-of-life care.

Guarded Access

Limit access to information only to those who need it, with tools like OAuth 2.0, IP filtering, secure print release, Wi-Fi Direct, LDAP, SMTP Authentication and encrypted PDF creation.

Secure Communication

Using HTTPS, TLS 1.3 and SMB 3.1.1 among others, we keep IPPS printing over TLS with SCEP certificate enrollment so that every step of the way is secure.

Protected Data Storage

Keep data under lock and key with AES 256 data encryption, certified by FIPS 140-3, IEEE 2600, HCD-PP and IEC-15408 as well as common criteria with HDD overwrite and trusted platform module.

Advanced Management

Three preset security level configurations ensure secure remote fleet management, with SNMP v3 and SIEM/Syslog monitoring, alongside secure boot and run time integrity checks.

Finish Projects In-House

A wide range of finishing options keeps your print jobs handled in-house.

Booklets

With the BF-9100 you'll have your new best friend when it comes to printing booklets, for uses which could include:

- + Product catalogs or brochures can be presented professionally
- + Event programs for open houses, productions or conferences can include all of the key details.

Z-fold

Take your 11" x 17" documents and fold them into 8.5" x 11" to have an opportunity to combine graphics and text.

- + Z-folds are a great way to present engineering schematics.
- + Multiple panels of a z-fold brochure provide ample space for images, graphics, and text, allowing for creative and engaging designs.

Inserter

This presence of two trays enables users to feed pre-printed pages as potential front or back covers or sheet inserts.

- + Avoids the need for pre-printed sheets to go through the high-temperature fusing process at the MFP.
- + Your pre-printed sheets won't get destroyed or melted.

Hole punch

Using the PH-7A or PH-7100, you can punch two or three holes and ensure ease of use of your document, including:

- + Reports, particularly on financial performance, which are going into a full binder for record keeping.
- + Training manuals and procedure guides which are stored and regularly updated.

Stapler

Ideal for your documents, staplers varied between 50 and 100 sheets give you the option for items like:

- + Medical packs including prescriptions, patient documents and other confidential documentation.
- + Combining multiple invoices or receipts for repeat customers or large events with multiple invoices.
